

WORKSHOP FLUORESCENT LUMINAIRE TYPE “ 5NJ 109 ” (TROG)

IP 20

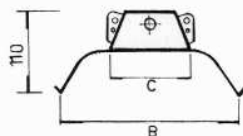

APPLICATIONS & GENERAL FEATURES

- Suitable for ceiling surface (or suspended) installation.
- Luminaires can be mounted in continuous rows by suspended steel tubes.
- Easy lamps switchgears inspection by removing reflector without tools.
- Reflector is made of cold rolled steel sheet, painted electrostatically.

FRAME DESCRIPTION

Frame is formed automatically from cold rolled steel sheet and painted electrostatically (white colour). Upward metal base is so designed that luminaires can be mounted in continuous rows by suspended steel tubes.
